2022 WEBINAR SERIES

Using Ontologies to Standardize
Rare Disease Data Collection
presented by Monarch Initiative

June 15, 2022 | 12 PM ET

REGISTER: https://bit.ly/RDCADAP_June_Webinar

This webinar will provide an overview of biomedical ontologies and demonstrate how they can be used for standardizing and integrating data and downstream analyses. In addition, we will discuss why you should contribute to ontology development efforts and how to do it.

The [Monarch Initiative](#) is an integrative data and analytic platform connecting phenotypes to genotypes across species, bridging basic and applied research with semantics-based analysis.
