
C-Path Appoints Dr. Amanda Klein as Executive Director for CPLD and CPA-1 Consortia

TUCSON, Ariz., April 17, 2024 — [Critical Path Institute](https://www.c-path.org/) (C-Path) today announced the appointment of Amanda Klein, Pharm.D., as Executive Director for its two newest public-private partnerships: the Critical Path for Lysosomal Diseases (CPLD) and the Critical Path for Alpha-1 Antitrypsin Deficiency (CPA-1) consortia. Klein brings a wealth of experience, having previously served as Executive Director of C-Path's Transplant Therapeutics Consortium (TTC), where she orchestrated successful composite biomarker qualification submissions with the U.S. Food and Drug Administration (FDA) and European Medicines Agency.

Dr. Klein's tenure at C-Path has been marked by her results-driven approach and her collaboration across consortia leadership to accelerate the drug development process, addressing unmet needs across various therapeutic areas. Her background as a clinical pharmacist and her direct patient care experience over more than a decade enriches her perspective on the urgent needs within drug development.

"In her time at C-Path, Amanda has demonstrated a unique ability to quickly navigate complex learning curves, a remarkable capacity for leadership, and a deep commitment to our mission of accelerating the path to drug development through collaboration," said Klaus Romero, M.D., M.S., FCP, Chief Executive Officer of C-Path. "Her expertise and evidence-based approach will be invaluable as we continue to advance our work with CPLD and CPA-1, addressing critical areas in lysosomal diseases and alpha-1 antitrypsin deficiency."

The CPLD Pre-Consortium, established in 2023, aims to forge dynamic public-private partnerships to enhance the drug development process for lysosomal diseases, improving the quality of life for those affected. Likewise, the CPA-1 Consortium, launched in March 2024, focuses on accelerating drug development for alpha-1 antitrypsin deficiency through collaborative efforts that leverage data and develop regulatory-grade solutions across CDER, CBER, and CDRH within the FDA.

"Taking on the roles of Executive Director for CPLD and CPA-1 is an immense honor and responsibility," said Klein. "I am excited to continue advancing the impactful work of these consortia, building on the collaborative foundation laid by the dedicated professionals at C-Path and our partners. Together, we will continue to make significant strides in drug development for lysosomal diseases and alpha-1 antitrypsin deficiency."
