

Webinar: The Use and Development of DHTs with Patient Advocacy Groups

The graphic is a promotional poster for a webinar. It features a dark blue background with a faint, repeating pattern of people. In the top left, there are logos for 'RARE AND ORPHAN DISEASE PROGRAMS' and 'RDCA-DAP' (Rare Disease Cures Accelerator Data and Analytics Platform), both associated with the 'CRITICAL PATH INSTITUTE'. The text 'WEBINAR SERIES' is prominently displayed in white. On the right, a yellow rounded rectangle contains the date and time 'Thurs | May 23 10 AM ET' and a large blue 'REGISTER NOW' button with a white cursor icon pointing at it. In the center, a man with short brown hair, wearing a light blue button-down shirt, stands with his arms crossed. To his right, the title 'The Use and Development of DHTs with Patient Advocacy Groups' is written in large, bold, yellow letters. At the bottom, a solid blue bar contains the speaker's name and affiliation in white text.

Laurent Servais, MD, PhD
University of Oxford, UK,
University of Liège, Belgium

On Thursday, May 23, C-Path was joined by Dr. [Laurent Servais](#) of the University of Oxford and the University of Liège, for an overview of Actimyo and relevant learnings from use cases across rare disorders spanning different degrees of complexity and readiness. Additionally, patient advocacy group leaders will speak to their experience based on stage of development and the ability of Actimyo to assess individuals with a neuromuscular disorder or non-NMDs (e.g., Duchenne muscular dystrophy, Angelman syndrome, and CTNNB1).
