Critical Path Institute's International Neonatal Consortium (INC) invites you to join an upcoming webinar:

Addressing the Lack of Standardized Laboratory Reference Ranges in Neonatal Trials: Pilot GUI Launch

Date: October 30, 2025

Time: 12:00 PM ET

This session will provide an overview of the **Neonatal Lab Values Graphical User Interface (GUI)** — a new interactive pilot tool designed to advance neonatal clinical research.

The GUI enables exploration of **real-world neonatal laboratory data**, presenting harmonized reference ranges and distributions across gestational ages and postnatal timeframes. With this tool, stakeholders can:

- Inform clinical trial design with more robust data
- Enhance safety assessments for neonates
- Facilitate regulatory-grade discussions with shared evidence
- This is a pilot version, and your feedback will be vital. Insights from regulators, clinicians, and industry partners will help shape refinements to maximize its impact.

Register today to reserve your spot:
