

C-Path Newsletter Q2 2026: New Leadership, New Science

Dear C-Path Community,

What a quarter it has been. Building on the strong momentum of the first quarter, we have continued to deepen collaboration, accelerate innovation, and drive meaningful impact across the global drug development ecosystem and I couldn't be more energized by what our community has accomplished together.

I am especially pleased to share some exciting news on the leadership front. We welcomed Karen Bernstein, co-founder and chair of BioCentury Inc., as the new Chair of our Board of Directors, a fantastic addition whose deep industry insight will help sharpen our strategic vision as we look ahead. Karen succeeds Wainright Fishburn, and on behalf of all of us at C-Path, I want to extend our deepest gratitude to Wain for five years of dedicated leadership and service as Board Chair. We also had the pleasure of welcoming two outstanding new members to our Board: [Milad Alucozai](#) and [Yalonda Howze](#), whose expertise in biotech investment and life sciences law will strengthen our Board as C-Path continues to grow.

Karen Bernstein, Ph.D.

Milad Alucozai, DrPH

Yalonda Howze, J.D.

Our science kept pace with equal momentum. In May, we launched the [New Approach Methodologies Developer Coalition \(NAMs-DC\)](#), a first-of-its-kind precompetitive coalition bringing together developers of organ chips, complex in vitro models, and computational tools to build a shared qualification framework and reduce reliance on animal testing, a genuinely exciting step toward more human-relevant drug development. And in June, following the FDA's accelerated approval of the first disease-modifying therapy for stage 3 type 1 diabetes, we [reaffirmed our commitment](#) to advancing the regulatory-science foundation for this next wave of T1D therapies, expanding our C-peptide evidence base to 74 clinical trials in the process. It's the kind of collaborative, precompetitive work our community does best, and I'm proud of what our T1D Consortium has built.

Looking ahead, I am thrilled about the momentum building toward the 2026 C-Path Global Impact Conference, September 15–17 in Washington, D.C. This is one of my favorite times of year, a chance for our entire community of patients, researchers, regulators, and industry partners to come together and chart the path forward for the science and tools that are changing lives. Registration is open [here](#). I hope to see many of you there.

There is so much more to come this year, and I am grateful every day for the trust, partnership, and shared purpose that make C-Path's mission possible. Thank you for being part of this journey with us.

With gratitude and excitement,

Klaus Romero

Make the Most of Your GCIC Experience: Two Reasons to Extend Your Stay

A promotional graphic for the C-PATH 2026 Global Impact Conference. The background is a photograph of a family (a man, a woman, and a child) embracing outdoors at sunset. Overlaid on the left is a blue and yellow globe logo. Text on the left includes 'C-PATH 2026', 'GLOBAL IMPACT CONFERENCE', and 'WASHINGTON, DC | SEPT 15-16'. A yellow button with 'REGISTER NOW' is below the text. At the bottom right is the Critical Path Institute logo, which consists of a stylized 'C' and the text 'CRITICAL PATH INSTITUTE'. The bottom left features a pattern of blue and white hexagons.

While you're in Washington, D.C. for CGIC, consider bookending your trip with two more opportunities happening at the same hotel.

Got Data? Evaluating Real-World Data Suitability to Inform Regulatory Decision-Making

The poster features a blue background with a white and yellow geometric design on the left. The title 'Got Data? Evaluating Real-World Data Suitability to Inform Regulatory Decision-Making' is in white and yellow text. Below the title, the date and time 'Monday, September 14 | 9:00 AM - 12:30 PM ET' and location 'Washington Marriott at Metro Center, Downtown D.C.' are listed. A yellow 'REGISTER NOW' button is at the bottom left. On the right, there are five circular headshots of speakers: Kasey Baker (NORD), Alexandre Bétourné (C-Path), Smith Heavner (C-Path), William Roddy (C-Path), and Nicole Vasilevsky (C-Path). Logos for 'C-PATH 2026 GLOBAL IMPACT CONFERENCE WASHINGTON, DC | SEPT 15-16' and 'RDCA-DAP RARE DISEASE CURES ACCELERATOR DATA AND ANALYTICS PLATFORM' are at the top right. A note at the bottom right says '*Additional speakers added soon!'.

Got Data?
Evaluating Real-World Data Suitability to Inform Regulatory Decision-Making

Monday, September 14 | 9:00 AM - 12:30 PM ET
Washington Marriott at Metro Center, Downtown D.C.

[REGISTER NOW](#)

Speakers:

- Kasey Baker (NORD)
- Alexandre Bétourné (C-Path)
- Smith Heavner (C-Path)
- William Roddy (C-Path)
- Nicole Vasilevsky (C-Path)

*Additional speakers added soon!

Monday, Sept. 14 | 9 a.m. – 12:30 p.m. | Free

Real-world data holds real promise for regulatory decision-making, especially in rare diseases, but only when it's fit for purpose. Join our Rare Disease Cures Accelerator team for an interactive workshop introducing a structured framework for evaluating RWD quality and suitability. Space is limited.

Evidence Generation for Scalable Advanced Therapies | A focused half-day convening from One to Millions

Thursday, Sept. 17 | 8 a.m. – 12 p.m. | \$249

Stay an extra day for a deep dive into One to Millions, C-Path's initiative to scale individualized breakthroughs into global solutions. This interactive half-day session brings together KOLs, advisors, and members to shape the next phase of the initiative, a chance for engagement beyond the core conference agenda. Limited space; additional fee applies.

Honoring Awareness, Advancing Action

C-Path's Ragasudha Botta Sits Down with Bio.News in Honor of Women's Health Month

May was Women's Health Month and in observation, Bio.News sat down with Ragasudha Botta, MBBS, Ph.D., MMSc, Senior Scientific Director, of C-Path's Critical Path for Parkinson's consortium to discuss how women's lived experiences with Parkinson's disease have too often been overlooked in clinical research and treatment development — and have even resulted in later diagnoses.

Advancing Hope in Progressive Supranuclear Palsy: Collaboration, Data, and Innovation During PSP Awareness Month

Each May, Progressive Supranuclear Palsy (PSP) Awareness Month shines a light on a devastating neurodegenerative disease that remains widely underrecognized, despite its profound impact on patients, families, and caregivers. PSP is a rare brain disorder that affects movement, balance, speech, swallowing, vision, and cognition. Over time, people living with PSP often experience increased difficulties with mobility and daily function, while facing a significant lack of effective treatment options.

Huntington's Disease Awareness Month: Advancing Drug Development Through Lived Experience

Huntington's Disease Awareness Month serves as an important opportunity to raise visibility for Huntington's disease and recognize the urgent need for continued scientific innovation, advocacy, and collaboration in the pursuit of meaningful therapies for individuals and families affected by this devastating condition.

Read the blog here: [Huntington's Disease Awareness Month: Advancing Drug Development Through Lived Experience](#).

ALS Awareness Month: Connecting the Dots in ALS Research

Under the neurodegenerative disease umbrella, C-Path co-stewards the ALS Knowledge Portal infrastructure with the NIH and helps shape regulatory endpoints for the [ALL ALS](#) natural history study. Digital health technology working groups, including the teams analyzing the actigraphy data, sit directly inside this program.

Reusing curated information prevents researchers from wasting years by recreating foundational knowledge. Collin Hovinga recently addressed this urgency during an episode of [The Critical Path Institute Podcast](#), noting that every precious data point counts.
