CRITICAL PATH INSTITUTE

View Now | Using Ontologies to Standardize Rare Disease Data Collection presented by Monarch Initiative

REGISTER: https://bit.ly/RDCADAP_June_Webinar

This webinar will provide an overview of biomedical ontologies and demonstrate how they can be used for standardizing and integrating data and downstream analyses. In addition, we will discuss why you should contribute to ontology development efforts and how to do it.

The Monarch Initiative is an integrative data and analytic platform connecting phenotypes to genotypes across species, bridging basic and applied research with semantics-based analysis.
