

## Poster Presentation at the 2019 Alzheimer's Association International Conference, July 14-18, 2019, Los Angeles, CA

The Alzheimer's Association International Conference (AAIC) is an important annual scientific meeting where international investigators, clinicians and care providers gather to share the latest study results, theories and discoveries that will help bring the world closer to breakthroughs in dementia science. This year's conference will be hosted in Los Angeles, CA, between July 14th and 18th.

Each year, on behalf of our consortium members, CPAD attends AAIC to share the consortium's vision, goals, and latest milestones of our work with the research community, to educate ourselves on latest developments and trends, and to meet and exchange information with our members and other key opinion leaders. This year, one poster (P4-253) was accepted for presentation.
