

Vanda Molnar

Vanda holds Bachelor's degrees in Economics and Mathematics from the University of Alaska, and has previously worked at Google as a QC coordinator. Vanda grew up in Hungary and moved to the United States ten years ago. She spent seven years in California and two in Alaska before joining us in Tucson. Vanda is the CPAD Data Manager and will perform the key role of data exploration to catalog clinical trial/study details, including inclusion criteria, endpoints and outcome measures which will facilitate execution of CPAD's quantitative modeling strategy together with the Quantitative Medicine team at C-Path.
