

## ePRO Consortium Announces Open Access Article

In collaboration with the DIA Study Endpoints Community, C-Path's ePRO Consortium is pleased to announce the open access article "Considerations for development of an evidence dossier to support the use of mobile sensor technology for clinical outcome assessments in clinical trials" is available online in the April 1, 2020 issue of Contemporary Clinical Trials. This article provides recommendations for the structure and content of an evidence dossier aimed at supporting a clinical trial endpoint derived from mobile sensor data as fit-for-purpose in regulatory decision making.
