

Alexandre Bétourné, PhD, PharmD

Alexandre Bétourné, Ph.D., Pharm.D., is Executive Director for the Rare Disease Cures Accelerator-Data and Analytics Platform initiative and previously served as its Scientific Director. Dr. Bétourné works with the RDCA-DAP team to expand its reach into new diseases areas accessing new data and enhancing C-Path's relationships within the rare disease community. He holds both a PhD and a PharmD from the University of Toulouse in France, has three patents, and has written multiple papers that intersect with several different rare disease areas. Before joining C-Path, he led a team of senior U.S. scientists, CMC and regulatory consultants at a small company developing therapies for amyotrophic lateral sclerosis (ALS).
