

Selection of and Evidentiary Considerations for Wearable Devices and Their Measurements for Use in Regulatory Decision Making: Recommendations from the ePRO Consortium

This webinar provides a recommended framework for the selection and evaluation of wearable devices and their measurements for use in regulatory trials to support labeling claims. The webinar will also address the essential properties of fit-for-purpose wearables and the activities required to establish clinical endpoints derived from data collected with wearable devices.

Presenters: Bill Byrom, PhD (ICON) and Chris Watson, PhD (ERT)
