# Training on the Use of Technology to Collect Patient-Reported Outcome Data Electronically in Clinical Trials: Best Practice Recommendations from the ePRO Consortium (May 10, 2018)

This webinar provides a recommended framework for training end users, including site staff and study participants, on the use of ePRO technology in clinical trials. The goal of the webinar is to promote consistent and sufficient training prior to initiating data collection.

Presenters: Jenny J. Ly, PhD (ERT) and Serge Bodart, MSc (Bracket)
