

Sample Size Calculator for a Surrogate Endpoint in Kidney Transplant Clinical Trials

When: Thursday, June 30, 10 a.m. – 12 p.m. ET

C-Path's Transplant Therapeutics Consortium (TTC) invites you to join its upcoming webinar, Sample Size Calculator for a Surrogate Endpoint in Kidney Transplant Clinical Trials. TTC, in collaboration with key opinion leaders from academic institutions, the pharmaceutical industry, health authorities and the patient community, is hosting this event for stakeholders to come together and discuss the pursuit of qualification of the iBox Scoring System as a (reasonably likely) surrogate endpoint with FDA and EMA, the clinically meaningful differences in iBox parameters and a graphical user interface for sample size calculation using iBox scores.
