CRITICAL PATH INSTITUTE

View Now | 2022 RDCA-DAP Workshop, September 13-14

Since its launch in 2019, the Rare Disease Cures Accelerator-Data and Analytics Platform initiative (RDCA-DAP®) has established itself as the leading platform to accelerate rare disease treatment innovation.

Join us this September as we bring rare disease stakeholders together for next-level platform demonstrations and case studies, industry expert presentations, panel discussions and more.

Attendees of the 1.5-day workshop, including patients, providers, researchers, clinicians, biopharmaceutical companies, regulatory reviewers and scientists, will leave with an understanding of:

- RDCA-DAP's current and future impact on drug development in rare diseases from the perspectives of patients, regulators and industry partners
- How RDCA-DAP is unique in supporting multiple data and analysis-types across rare diseases
- The critical importance of building a rare disease community that works together to share optimal data and generate actionable solutions for the benefit of all rare disease patients

The Rare Disease Cures Accelerator-Data and Analytics Platform is an FDA-funded initiative with the goal of accelerating therapy development across rare diseases. The platform serves as a centralized and standardized infrastructure to host and share rare diseases data, to support and accelerate rare disease innovation.

We look forward to your participation!
