

## eCOA Consortium and PRO Consortium Announce Publication of Two Open Access Articles

C-Path's [eCOA Consortium](#) and [PRO Consortium](#) are pleased to announce the publication of two open access articles in the *Journal of Patient-Reported Outcomes*, titled "[Comparability of a Provisioned Device Versus Bring Your Own Device for Completion of Patient-Reported Outcome Measures by Participants with Chronic Obstructive Pulmonary Disease: Qualitative Interview Findings](#)" and "[Comparability of a Provisioned Device Versus Bring Your Own Device for Completion of Patient-Reported Outcome Measures by Participants with Chronic Obstructive Pulmonary Disease: Quantitative Study Findings.](#)"

Taken together, these publications outline the findings from a mixed method study including qualitative and quantitative components that compares the use of participant's own cell phone ["bring your own device" (BYOD)] with the use of a provisioned device (PD) to complete patient-reported outcome (PRO) measures.
