This webinar presents an overview of the [published article](#) in the *Journal of the Society for Clinical Data Management* that provides key best practices of electronic clinical outcome assessment data changes that are aligned to the latest health authority guidance. From 2018 to 2022, 45 representatives of Critical Path (C-Path) Institute's Patient-Reported Outcome (PRO) Consortium, eCOA Consortium, and the eClinical Forum collaborated to develop guidelines on changes to eCOA data. The resulting core principles can become the foundation upon which sponsors, investigators, and eCOA providers can evaluate and manage data change requests (DCRs).

Moderator: Scottie Kern (C-Path)

Presenters:

- Trish Shepherd DeLong (J&J Innovative Medicine)
- Demian Humler (Clario)
- Alan Yeomans (Viedoc)
