

Workshop: 21st Century Trials in New-Onset T1D

The graphic features the Critical Path Institute logo with a '20 YEARS OF IMPACT' anniversary mark. The main title is '21st Century Trials in New-Onset T1D' with a 'VIRTUAL WORKSHOP' badge. Below the title is the subtitle: 'HOW THE USE OF C-PEPTIDE CAN ACCELERATE DEVELOPMENT OF NEXT-GEN DISEASE MODIFYING THERAPIES FOR T1D'. The dates and times are 'JUNE 17 - 18' and '9:30 AM - 2:15 PM ET'. A registration link is provided: 'REGISTER NOW AT CPEPTIDE.HEYSUMMIT.COM'. On the right side, there are three images: a stylized orange pancreas on a blue background, a scientist in a lab coat, and a young boy and a woman, likely a patient and caregiver, with medical sensors on their arms.

Please join us on June 17-18 for Critical Path Institute's Type 1 Diabetes consortium for our upcoming virtual workshop, 21st Century Trials in New-Onset T1D: How the use of C-Peptide can accelerate the development of next-gen disease-modifying therapies for T1D.

The purpose of this scientific workshop is to gather researchers, physicians, industry, patient advocacy and regulators in order to discuss the current evidence for the use of c-peptide as an endpoint in clinical trials of new-onset T1D. We aim to reach conclusion and clarity on next steps.?

The preliminary agenda is as follows:

- Session 0: Welcome and Introductory Remarks
- Session I: C-peptide, T1D and unmet need
- Session II: Current state of clinical trials in New-Onset T1D
- Session III: C-peptide and clinical benefits in T1D
- Session IV: How can C-peptide be used to accelerate drug development in New-Onset T1D?
- Panel Discussion: Big picture: where do we stand and what's next?
