Unlocking the power of data for faster health solutions.

- NCATs has invested in new ways to connect, access, and learn from large and complex data sets.
- They have created and used data tools and methods in new ways to speed up drug development for rare diseases.
- The agencies started CURE ID in 2019, aiming to use bioinformatics, precision medicine, clinical research informatics, data science, and artificial intelligence in one integrated conference.
- CDRC members will be presenting at the AMIA 2024 Informatics Summit from March 18th to 21st in Boston, MA.
- The public meeting is scheduled for March 1st, 2024, virtually from 9:00 AM to 4:30 PM ET.
- The Public meeting for FDA Rare Disease Day 2024 will take place on March 1st.
- Join the NIH, FDA, and partners in advancing our understanding of the treatments of Long COVID.
- Last month, a U.S. government initiative launched a pair of surveys to collect information about people with Long Covid.
- The surveys, one for patients and one for their doctors, will inform priorities for clinical trials.
- The surveys are seeking information on how people with Long Covid are managing their symptoms.
- Data from these surveys will help to inform the treatment strategies and options for people with Long Covid.
