We appreciate everyone who came and we look forward to future collaboration. Challenges in drug repurposing.

Importance of working together across agencies and organizations to address the regulatory agencies, and many more were represented. There were many keynotes.

The CDRC Meeting on April 18th-20th was a great success! Stakeholders, advocates, patients, patient organizations, drug developers, the academic community, regulators, and more were represented. There were many keynotes as well as panel discussions. The CDRC Annual Meeting is organized by (FDA) in partnership with the National Center for Advancing Translational Sciences (NCATS), part of the National Institutes of Health (NIH).

Joining the CDRC is looking to recruit individuals interested in helping promote our web-based platform. The platform enables healthcare providers to share their real-world experiences and best practices with others in the community.

Looking to become a social media ambassador? This is an unpaid position but can win CURE ID/CDRC swag. Reach out to the Communication and Patient Engagement Manager, Claire Bassetti at cbassetti@cpath.org if interested in sharing your story through an Impact Story.
