

NEONATAL ADVERSE EVENT SEVERITY SCALE (NAESS)

NAESS is the 1st neonatal-specific AE severity grading instrument

Infant SAFETY is important to all stakeholders in clinical research

Developed with input from parents, nurses, physicians, & representatives from industry and regulatory agencies

Parents and nurses offer unique insight into infant's change in baseline

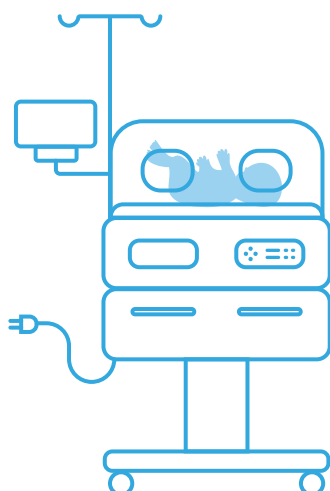

Can be used by local investigators, sponsors, and regulatory groups

Mapping to MedDRA and standard terminology supports regulatory processes

Can help inform pharmacovigilance reviews, pediatric safety reports, & benefit/risk assessment

Validation is ongoing. Education is needed for ALL stakeholders.
